My Opinion I believe it has been totally wrong in the first place of any of the States and or the U.S. Government to ever go after Microsoft in any way. Including trying to discredit Microsoft suggest fining them or breaking the company in half. How many millions of dollars has the U.S. Government spent of our tax money? I personally think it is American Politics at its best or worst. I have sent letters to the Attorney Generals about the U.S. Post Office of their price fixing and fraud. Our Government never acknowledges any Correspondance as if nothing is wrong. Sincerely Arch Lang
